

# A Smarter Approach to Managing Production by Exception

Increase Efficiency | Lower Costs | Maximize Recovery

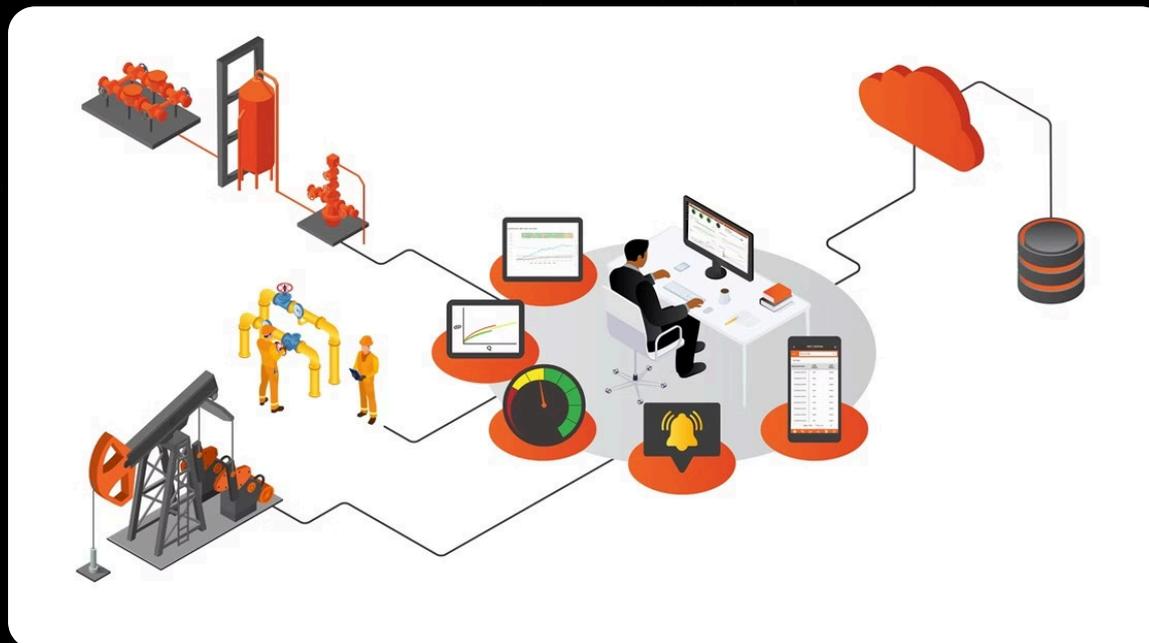

Revo iQ® is an automated tool for reservoir surveillance and production management, offering real-time insights from flowback through long-term production to optimize performance and boost operational efficiency—enhancing both your asset and organization

Trusted by 90+ operators  
across the globe

Over 1,800 wells managed  
in multiple basins

# Revo iQ® Key Features

## Seamless Data Integration

Automate data flow and ensure real-time accessibility

- Manual & Automated Data Entry
- Third-Party SCADA & Visualization Tools
- Bidirectional Data Warehouse Integration
- Internal & External Communication Flexibility

## Real-Time Production Management

Automated analysis for smarter, quicker decision-making

- Bottomhole Pressure Conversion
- Advanced Diagnostic Tools - RAPD™ and APEX™
- Variable Pressure Decline Curve Analysis
- Type Curves and Well Comparisons
- Geospatial Analysis

## Production Guidance Alerts

Manage by exception with instant well performance insights

- Actionable Insights
- Automated and Customizable
- Intelligent Performance Tracking

## Pricing Structure

Affordable, flexible, and hassle-free business model

- No License Required
- Unlimited Users
- Cloud-Based for Access Anywhere, Anytime

## Enhance Your Asset & Organization

With Revo iQ®, you get **real-time guidance**, **automated performance diagnostics**, and **adaptive optimization**—ensuring your production strategy remains at peak efficiency.

**Contact us today to learn more on how you can streamline your workflow starting at flowback!**
